

MEET TAKE-DOWN

1. Meet take-down volunteers assist the Parent Reps clean-up the pool after home swim meets, and to store the team's meet equipment.
2. Meet take-down volunteers should report to the Parent Reps immediately after the last event of the meet. Be prepared to work cleaning up the pool and storing equipment until you are released by the Parent Reps. Meet take-down usually takes about two hours, although more time may be necessary to clean-up after the RMSL Finals meet. Please allow sufficient time to work your entire shift.
3. Meet take-down requires a significant amount of lifting and carrying, so individuals with physical limitations that would make such work painful or difficult should not sign up for meet take-down volunteer shifts.
4. Meet take-down involves moving meet materials from the competition pool to the team's storage closet near the south pool. These items include canopies, folding tables for concessions and the scoring table, wooden benches for the heating area, backstroke flags and the false start rope. The materials should be moved and stored at the direction of the Parent Reps.
5. Do not leave the pool until you are released to do so by the Parent Reps.
